GOPEK.DIGITAL — COMPLETE WEBSITE BUILD PROMPT FOR GOOGLE AI STUDIO

MASTER INSTRUCTIONS + EXACT PAID SALES PAGE COPY + EXACT FREEBIE LANDING PAGE COPY

1. YOUR ROLE AND PRIMARY RESPONSIBILITY

Act as an expert website designer, UI/UX designer, visual art director, conversion-focused front-end developer, and technical implementation specialist.

Your task is to help me build **one complete, professional GoPek.digital website containing two distinct landing pages**:

1. The paid sales page for **YOUR FINAL YEAR PROTOCOL**.
2. The freebie landing page for **BEFORE THE YEAR ENDS**.

I have already written the copy for both pages. I have also prepared product mockups, worksheet previews, testimonial screenshots, and my personal photograph. Your responsibility is to turn these materials into an exceptional website through professional design, visual hierarchy, cinematic product presentation, responsive layouts, functional buttons, working theme toggles, and clean implementation.

I am asking you to design and implement my approved content, not to become my copywriter.

I am not a programmer. Keep the implementation understandable, maintainable, and suitable for a beginner to manage.

I am currently working with a zero-budget constraint. Do not assume I can pay for hosting, subscriptions, plugins, premium libraries, external services, or additional software. Use free solutions wherever practical. If a required feature cannot be achieved reliably for free, explain the limitation and offer the closest workable alternative before making a decision that changes the project.

Do not merely describe a website that could be built. Work within the capabilities of the current Google AI Studio environment to create the actual working website project, with its files, components, styling, and functionality.

If you need to inspect files before implementing anything, do that first. Do not claim to have inspected assets, tested functionality, connected services, or published the website unless you actually have.

---

2. CRITICAL COPY-PRESERVATION RULES

My supplied website copy is approved content. Treat the complete copy in Sections 17 and 18 of this prompt as the source of truth for the wording and intended order of the two pages.

You must not:

- Rewrite my headlines or paragraphs.
- Summarize or shorten my copy.
- Replace my wording with more conventional marketing language.
- Remove any sentence, bullet point, testimonial, name, product detail, or call to action.
- Invent additional marketing copy to fill empty spaces.
- Change my product names, subtitles, prices, ratings, review counts, download counts, or Gumroad links.
- Rewrite testimonials to make them sound more polished.
- Invent new testimonials, customer stories, results, statistics, endorsements, or claims.
- Move content into a different section when doing so changes the intended sequence or meaning.
- Omit content because it is too long for your preferred design.
- Silently correct spelling, punctuation, grammar, capitalization, or unusual wording in the approved copy.

You may choose appropriate HTML elements, font sizes, spacing, alignment, backgrounds, layouts, cards, responsive arrangements, and other visual treatments. You may divide a paragraph into visually readable lines where appropriate, provided that its wording remains unchanged.

If a line appears awkward, a sentence seems grammatically incorrect, a claim needs verification, or two instructions conflict, flag the issue and ask me before changing the approved content. Do not silently resolve such issues by rewriting my words.

IMPORTANT: DISTINGUISH WEBSITE COPY FROM PRODUCTION INSTRUCTIONS

This prompt contains both actual website copy and directions to you as the designer.

Only the actual website copy in Sections 17 and 18 is approved text to display.

Any instruction elsewhere in this prompt concerning visual treatment, layout, section order, button behavior, asset placement, styling, or technical implementation is a production instruction, not website copy.

Within the source copy below, I have deliberately used notes in parentheses, square brackets, capital letters, and explanatory phrases. These are production instructions unless they are explicitly part of a headline, paragraph, testimonial, or other actual copy.

Examples of production instructions that must never appear as visible website text include:

- “(WORD TO WORD, ABOVE THE TESTIMONIALS PICTURES)”
- “(THEN THE CHARITY STATEMENT HERE WORD TO WORD)”

- “[THE CORE ENGINES OF EXECUTION]”
- “[⚡ RECLAIM YOUR REALITY: FREE DOWNLOAD]” — this is an instruction identifying the exact button label, not a separate paragraph to print elsewhere.
- “(THIS IS THE FIRST MENTION OF FREE, IT SHOULD JUST STYLE, BOLDEN, BIGGER, LIGHTER COLOR)” — this is a styling instruction.
- “(THE TESTIMONIALS BELOW WORD TO WORD WITH THEIR NAMES, NO PICTURES BUT MAKE THIS WIDGET BEAUTIFUL AND CATCHY)” — this is a widget-design instruction.
- “(THEN UNDER THE BUY BUTTON AGAIN IT SHOULD WRITE WORD TO WORD ITALICIZED)” — this specifies the styling and placement of the checkout note.

Interpret every such instruction carefully. Use the actual copy associated with the instruction in the correct place, and do not print the instruction itself.

Some headings and phrases enclosed in quotation marks or brackets are part of the approved copy. For example, “THE AUTHOR PROFILER: RECONSTRUCTION FROM ZERO,” “WHY I CREATED THIS,” and “THE CORE ENGINES OF EXECUTION” identify sections or content headings. Treat them according to the context in which they appear in the supplied copy.

Do not confuse production notes with approved content simply because both use capitals or brackets. Follow the explicit distinctions in this prompt.

---

3. THE WEBSITE STRUCTURE: ONE WEBSITE, TWO PAGES

Build one cohesive GoPek.digital website with one codebase, one GitHub repository, one Cloudflare Pages project, and one custom domain.

Page A — Paid product

Product name: **YOUR FINAL YEAR PROTOCOL**

Exact subtitle:

The execution system for the person you still have time to become.

Page URL: `https://gopek.digital/`

Purpose: Present the paid execution system, explain its actual components and value, display the supplied product mockups and testimonials, communicate the approved offer, and direct visitors to purchase through Gumroad.

Paid Gumroad URL:

`https://gopekk.gumroad.com/l/yfyp`

Page B — Freebie

Product name: **BEFORE THE YEAR ENDS**

Exact subtitle:

A Life Audit for the Person You Still Have Time to Become.

Page URL: `https://gopek.digital/free`

Purpose: Introduce the life audit, help visitors understand what it contains, present the supplied previews and testimonials, and direct visitors to obtain the freebie through Gumroad.

Freebie Gumroad URL:

`https://gopekk.gumroad.com/l/bye`

How the two products relate

The freebie helps people examine their current reality, recognize patterns, and confront the gap between their intentions and actions.

The paid product provides the deeper execution system for implementing change.

The pages must complement each other without becoming duplicates. Each page should have its own visual identity, conversion objective, content presentation, and appropriate marketing assets.

---

4. BRAND DIRECTION AND VISUAL QUALITY

Create a polished, premium, contemporary website that looks deliberately art-directed rather than generated from a generic landing-page template.

The site should feel credible, visually distinctive, and professional. Pay attention to typography, whitespace, image composition, contrast, alignment, content hierarchy, section transitions, and the relationship between the copy and visual elements.

Overall design requirements

- Use a clean, premium, predominantly white or light theme by default.
- Use sophisticated typography and a clear hierarchy between headlines, subtitles, body text, captions, and buttons.
- Use restrained accent colors and carefully selected supporting backgrounds.
- Avoid clutter, excessive gradients, generic stock-photo aesthetics, oversized decorative elements, and repetitive card layouts.
- Do not make every section look the same.
- Use visual storytelling to support the copy rather than distract from it.

- Make the website feel like one brand while giving the two pages different visual personalities.
- Ensure the pages look exceptional on desktop, tablet, and mobile.
- Do not allow long headlines, buttons, product images, or testimonial content to overflow or become difficult to read.
- Maintain readable contrast in both light and dark themes.
- Do not add intrusive pop-ups, unnecessary cookie prompts, or artificial human-verification interstitials.

Paid page visual identity

The paid page should communicate authority, focus, discipline, urgency, execution, and the value of a comprehensive digital system.

Use a strong hero composition, carefully arranged product mockups, purposeful visual separation between the three phases, convincing presentation of the supplied testimonial screenshots, and a clear offer area.

The page should look like a premium digital-product sales experience, not a generic motivational ebook page.

Freebie page visual identity

The freebie page should communicate clarity, self-confrontation, reflection, urgency, and the opportunity to change direction.

Use a distinctive hero, prominent free-download treatment, elegant worksheet previews, attractive software-box mockups, and a beautifully designed testimonial widget.

Do not simply copy the paid page and change its product name. It must be a separately art-directed experience within the same brand.

---

5. REQUIRED LIGHT/DARK THEME TOGGLE

Both pages must have a functional light/dark theme toggle.

This is a requirement, not an optional decoration.

Exact placement

On each page, use this order at the top:

1. The top-level header/navigation, if included.
2. The page's correct rating or social-proof line.
3. The light/dark theme toggle **immediately beneath the rating line**.

4. The hero section.

The theme toggle must appear above the hero. Do not put it inside the hero, in the footer, inside a menu, or in a floating corner.

Correct rating lines

Paid page:

`★ ★ ★ ★ ★ 5 | 385 REVIEWS`

Freebie page:

`★ ★ ★ ★ ★ 5 | 1,574 DOWNLOADS`

Preserve the exact figures and the distinction between reviews and downloads. Do not change these figures or manufacture additional social-proof claims.

The paid rating must display five full stars followed by `4.9 | 385 REVIEWS`.

Toggle behavior

- Both pages default to light mode when no saved theme preference exists.
- The toggle must actually change the appearance of the entire page between light and dark themes.
- Both themes must be intentionally designed. Do not simply invert every color.
- The dark theme must preserve legibility, contrast, attractive product mockups, readable testimonials, and usable buttons.
- The theme choice should persist across navigation between `/` and `/free`, and across later visits where practical.
- Avoid a visible flash of the wrong theme during page loading where practical.
- Make the toggle accessible, responsive, and usable by keyboard and touch.
- Provide an appropriate visual indication of the currently selected theme.
- Use lightweight CSS and JavaScript rather than a heavy theme library.

The PDFs shown in product mockups must retain their supplied appearance. Do not alter the source PDF artwork merely because the website theme changes.

---

6. ZIP FOLDER AND ASSET INSPECTION

I will provide a ZIP folder containing the website instructions, copy, and media.

Inspect the ZIP and its contents before implementing the website. Do not assume that an asset exists simply because I have described it.

The ZIP is expected to contain three main items.

Folder 1: `1. Your Final Year Protocol Sales Page Content and Media`

Expected contents:

A. Six testimonial screenshots

- `testimonial 1`
- `testimonial 2`
- `testimonial 3`
- `testimonial 4`
- `testimonial 5`
- `testimonial 6`

Use these six supplied screenshots on the paid sales page.

Preserve the original screenshots. Do not rewrite their text, invent additional testimonials, or replace them with text-only cards.

Display them in an attractive, professional layout. You may use a responsive grid, a carousel, or another well-designed presentation if the screenshots remain legible and visitors can access the testimonials comfortably.

B. Four paid-product mockup PNG files

- `Your Final Year Protocol Mockup 1`
- `Your Final Year Protocol Mockup 2`
- `Your Final Year Protocol Mockup 3`
- `Your Final Year Protocol Mockup 4`

These show the product through software-box, laptop, iPad, and iOS/device-style mockups.

Use the actual supplied files. Study each image and decide which composition is most appropriate for each section.

You are expected to art-direct and combine the supplied mockups in different visual arrangements where the source images support doing so. Examples include:

- A laptop presentation paired with the software box.
- A laptop, box, and tablet composition.
- A software-box-only presentation.
- Different mockup angles or compositions at different stages of the page.

Do not repeatedly display the same composition everywhere. Create a considered visual sequence that makes the product feel substantial and professionally presented.

If the supplied mockups are already flattened PNG images, do not pretend that you can independently extract and reposition the devices inside those images. Instead, arrange the supplied PNGs together using CSS, layering, spacing, scaling, shadows, and appropriate backgrounds. If the files contain transparent backgrounds, preserve them where practical.

Use only supplied or explicitly approved product assets. Do not replace the real product mockups with unrelated generated artwork.

C. My personal photograph

Place my photograph in **Section 2: “THE AUTHOR PROFILER: RECONSTRUCTION FROM ZERO”** on the paid page.

The image should feel cinematic, professional, and carefully integrated into the author-story section.

Use a sophisticated, mostly monochrome treatment with restrained tonal contrast, subtle vignette effects where suitable, and an editorial composition. Avoid full, oversaturated color.

The image must remain recognizable and respectful. Do not distort my appearance, invent a different person, or use effects that make the image look artificial. Do not imply that the photograph was taken in a location or situation that it does not depict.

Folder 2: `2. Before The Year Ends Landing Page Content and Media`

Expected contents:

A. Eight worksheet/page-preview images

- `before the years ends page for visual mckup display 1`
- `before the years ends page for visual mckup display 2`
- `before the years ends page for visual mckup display 3`
- `before the years ends page for visual mckup display 4`
- `before the years ends page for visual mckup display 5`
- `before the years ends page for visual mckup display 6`
- `before the years ends page for visual mckup display 7`
- `before the years ends page for visual mckup display 8`

Use these images as carefully selected visual previews of the freebie.

IMPORTANT — PROTECT THE FULL PRODUCT CONTENT

Do not expose the full pages of the freebie through the website's preview images.

The previews must function as teasers, not as replacements for downloading the product.

Display the title and, where appropriate, approximately the first four or five lines of a selected worksheet or page. The remaining lower portion of the page must be obscured, cropped, masked, faded, covered, or otherwise withheld so visitors cannot read the full worksheet.

Apply this treatment to every preview used as a marketing or proof image. Do not display any of the eight source pages in full if doing so reveals the complete worksheet or its useful contents.

Preserve the source images and create the teaser effect through suitable cropping, masking, layered presentation, or other lightweight visual treatments. Do not edit or overwrite the original files.

The previews should look deliberate and premium, not like accidentally cut-off screenshots.

B. Four freebie product mockup PNG files

- `before the year ends product mockup 1`
- `before the year ends product mockup 2`
- `before the year ends product mockup 3`
- `before the year ends product mockup 4`

These are software-box mockups presented from different angles.

Use them in different combinations and compositions, selecting the arrangement that best supports the section. Combine them with selected worksheet-preview images where appropriate.

Examples include a single box, multiple angled boxes, or a product mockup beside teaser previews.

The goal is a professional, cinematic product presentation that makes the freebie feel thoughtfully designed and worth downloading without revealing its full worksheets.

C. My personal photograph

Place my photograph in **Section 6: “WHY I CREATED THIS”** on the freebie page.

Use a cinematic, editorial, mostly monochrome treatment with subtle vignette effects where suitable. Keep the presentation elegant and respectful, with appropriate contrast and clear integration into the story.

Do not replace the photograph with an unrelated image or distort my appearance.

File 3: `2. Build my full website master prompt`

Inspect this document included in the ZIP. It contains the original master website instructions and additional information.

If the ZIP contains separate paid-page and freebie-page copy documents in addition to this prompt, inspect those documents too.

If any source document contradicts the exact copy or explicit corrections in this master prompt, do not silently choose one version. Report the conflict and ask me which version to use.

Asset handling rules

- Keep the paid-product assets on the paid page.
- Keep the freebie assets on the freebie page.
- Do not mix testimonial sets or product mockups.
- Use descriptive, organized asset filenames where appropriate.
- Optimize images for web delivery without noticeably damaging their quality.
- Preserve transparency when needed.
- Use responsive image sizing and appropriate loading behavior.
- Do not create a GIF or assume I am supplying one. **I will not be providing a GIF.**
- Do not make a GIF a requirement for the website.
- If a cinematic visual effect can be achieved with CSS, prefer that over creating a heavy animation.
- Do not invent missing product images or testimonial screenshots.
- If any required asset is missing, report it rather than pretending it is available.

---

7. CINEMATIC MARKETING VISUALS AND MOCKUP ART DIRECTION

The supplied product mockups are essential to the presentation of both pages. Do not merely place four images in a row and consider the task complete.

Study the available mockups, understand the differences between them, and plan where each will have the strongest visual effect.

Use a combination of:

- Appropriate image scale.
- Carefully controlled layering.
- Depth and spacing.
- Subtle shadows.
- Light, premium backgrounds.
- Deliberate image cropping.
- Balanced foreground and background elements.
- Restrained visual effects.

- Responsive arrangements for smaller screens.

For the paid product, use visual composition to reinforce the idea of a comprehensive execution system.

For the freebie, use visual composition to communicate a focused, well-designed life-audit experience while keeping the worksheet content protected.

Do not place decorative visual elements over important copy, buttons, or readable portions of testimonial screenshots.

Do not let product mockups dominate the page so much that visitors cannot understand the offer. The copy and the product imagery must support each other.

Where the mockups already include their own software-box or device imagery, respect the source artwork. Do not add false devices, false product features, or misleading visual claims.

Use the supplied photograph in the exact author-story sections specified above, not as a random hero image or generic background.

---

8. NAVIGATION, LINKS, BUTTONS, AND CTA BEHAVIOR

The following destinations must be used exactly.

Paid checkout:

`https://gopekk.gumroad.com/l/yfyp`

Freebie download:

`https://gopekk.gumroad.com/l/bye`

Paid website page:

`https://gopek.digital/`

Freebie website page:

`https://gopek.digital/free`

Paid-page buttons

Every actual paid-product purchase button must direct to:

`https://gopekk.gumroad.com/l/yfyp`

The first CTA in paid Section 4 is explicitly a text-only CTA. It must not have a price or a download/purchase button.

The first price-and-purchase CTA appears after the product-version descriptions in paid Section 6.

The final paid CTA appears in paid Section 7.

The price and offer must be presented consistently at both purchase points.

Freebie-page buttons

Every actual freebie download button must direct to:

`https://gopekk.gumroad.com/l/bye`

The instruction “[SCROLL DOWN TO GET YOUR FREE DOWNLOAD]” is a text-only directional CTA, not a button.

The freebie download buttons appear in Section 6 and Section 7.

Gumroad is the checkout and delivery destination

Do not build a fake checkout system.

Do not host the PDFs directly on this website.

Gumroad will handle the purchase or free-download flow and product delivery.

Use the supplied explanatory notes beneath the relevant buttons exactly as provided in the copy below.

Do not claim that the website itself processes payments, hosts downloads, or delivers encrypted files.

Do not create buttons that do nothing, link to the wrong product, or send visitors to the other product's Gumroad destination.

---

9. RATINGS, TESTIMONIALS, AND CLAIM INTEGRITY

Use the exact supplied rating lines.

Paid page:

`★ ★ ★ ★ ★ 5 | 385 REVIEWS`

Freebie page:

`★ ★ ★ ★ ★ 5 | 1,574 DOWNLOADS`

Do not interchange review counts and download counts.

On the paid page, use the six testimonial screenshot files supplied in the paid media folder.

On the freebie page, use the ten named testimonials included in Section 18 of this prompt. The freebie testimonials must appear as text-based testimonial cards or a beautifully designed testimonial widget, with the names and wording preserved.

Do not use images for the ten freebie testimonials. The instruction for that section is to display the testimonials as text, not as pictures.

Do not create fake customer photographs, fabricated verification badges, or unsupported claims that the testimonials have been independently verified.

Do not invent additional reviews or claim that any person achieved a result not stated in the supplied material.

Do not silently alter any testimonial text to improve grammar, remove emojis, shorten a review, or make it sound more professional.

---

10. INTERACTIONS, ANIMATIONS, PERFORMANCE, AND ACCESSIBILITY

The website should feel polished and responsive without becoming heavy or slow.

Appropriate effects may include:

- A restrained hero entrance.
- Subtle scroll-reveal effects.
- Gentle hover states.
- Smooth theme transitions.
- Carefully controlled image depth.
- Small interactions that help visitors understand the content.
- A testimonial carousel only if it remains easy to navigate and does not hide essential information.

Do not animate every element.

Do not delay the main content or essential calls to action.

Respect reduced-motion preferences. Visitors who prefer reduced motion should still receive a complete, usable website.

Make buttons and controls accessible to keyboard and touch users. Use semantic HTML, descriptive accessible labels, visible focus indicators, and readable text contrast.

Do not add heavy animation frameworks, unnecessary third-party scripts, expensive dependencies, paid analytics, or intrusive widgets without approval.

Optimize for mobile devices and slower connections. Use responsive layouts, appropriately sized images, and sensible loading behavior.

Ensure that the website remains usable if optional animation effects fail to load.

---

11. TECHNICAL ARCHITECTURE AND HOSTING

The intended deployment architecture is:

- One static website.
- One codebase.
- One GitHub repository.
- One Cloudflare Pages project.
- One custom domain: `gopek.digital`.
- Paid page at `/`.
- Freebie page at `/free`.
- Free HTTPS/SSL through the appropriate Cloudflare configuration.
- Automatic deployment from GitHub to Cloudflare Pages when changes are pushed to the connected repository, once the integration is correctly configured.

Prefer a lightweight implementation that is easy to maintain. Use free, established tools wherever practical.

Avoid unnecessary backend services because this is primarily a static marketing website with external Gumroad destinations.

Ensure both page URLs can be opened directly, including the `/free` route. Configure routing or static files appropriately for the chosen implementation.

Do not claim the custom domain, GitHub integration, Cloudflare project, or deployment has been configured unless that has actually been completed.

---

12. REQUIRED WORKFLOW: INSPECT FIRST, BUILD AFTER AUTHORIZATION

Follow these stages in order.

Stage 1 — Inspect the supplied files

Inspect the ZIP and all accessible relevant documents and assets.

Identify the master instructions, paid-page copy, freebie-page copy, product mockups, testimonial screenshots, worksheet previews, personal photograph, and any additional files.

Confirm which files were actually found and opened.

Stage 2 — Report findings and conflicts

Provide a clear report identifying:

- Which files and folders are accessible.
- Which required assets are present.
- Which required assets are missing.
- Whether any images appear damaged or unsuitable.
- Whether the copy documents contain conflicting versions.
- Whether any instructions are unclear.
- Any genuine technical limitations.
- Any essential decision that requires my input.

Do not ask me questions already answered by this prompt.

Do not resolve substantive conflicts by silently changing the approved copy.

Stage 3 — Stop and wait

After the inspection report, stop and wait for my explicit authorization to begin development.

Do not start coding or generating the website before authorization.

Do not publish the site to the live domain without separate explicit authorization.

Stage 4 — Build after authorization

Once I authorize development, implement both pages as one cohesive website.

Follow the exact page-specific copy and asset instructions. Preserve the intended section order and all required content.

Stage 5 — Verify the implementation

Before declaring the website complete, check:

- Both pages render correctly.
- Both direct routes work.
- All copy is present and preserved.
- The intended section order is respected.
- The paid and freebie subtitles are correct.
- The correct assets appear on the correct page.
- Worksheet previews do not reveal complete pages.

- The paid testimonial screenshots are present.
- All ten freebie testimonials appear with their correct names.
- Rating lines and figures are correct.
- The theme toggle is immediately below the rating line and above the hero.
- Light mode is the default when no preference is saved.
- Both theme toggles work.
- The theme preference carries across both pages where practical.
- All buttons and links have the correct destinations.
- Price displays and checkout notes are correct.
- Mobile, tablet, and desktop layouts have been checked.
- Animation, contrast, keyboard use, and reduced-motion behavior have been considered.
- There are no obvious broken images, missing sections, or nonfunctional controls.

Report what you actually tested, what passed, and what could not be verified.

Stage 6 — Explain the update and publishing workflow

Explain, in beginner-friendly language, how future updates will move through the actual setup:

Website files → GitHub repository → Cloudflare Pages deployment → `gopek.digital`.

Identify which steps are automatic and which require manual action. Do not claim automatic synchronization unless it has been configured and verified.

---

13. NON-NEGOTIABLE PAID PRODUCT DETAILS

The paid product is named:

YOUR FINAL YEAR PROTOCOL

Its exact subtitle is:

The execution system for the person you still have time to become.

The paid product is offered at **$27**, with **$67 crossed out** as the reference price in the supplied offer presentation.

The offer line must preserve the exact wording supplied below.

The product is presented in two digital formats containing the same execution system:

- Standard Version.

- Fillable Version.

The paid page must communicate the product's three-phase architecture:

1. The Life Alignment Diagnosis.
2. The Urgency Catalyst (Memento Mori).
3. The Fearless Formula (The Execution Code).

The product presentation must remain faithful to the supplied copy. Do not invent extra modules, features, bonuses, or product contents.

---

14. NON-NEGOTIABLE FREEBIE DETAILS

The freebie is named:

BEFORE THE YEAR ENDS

Its exact subtitle is:

A Life Audit for the Person You Still Have Time to Become.

It is free and directs visitors to the supplied Gumroad page.

The freebie page must communicate its life-audit purpose, show carefully protected worksheet previews, explain the supplied diagnostic workspaces, display the ten written testimonials, present the creator story, explain the Standard and Fillable versions, and include the required download CTAs.

Special treatment for the first FREE mention

In Freebie Section 1, the first mention of `100% FREE` must be visually prominent. Use bold typography, a larger size, and a lighter or brighter accent color appropriate to the selected theme. Make it immediately noticeable without overpowering the headline.

Do not add the styling instruction itself to the page.

Freebie preview protection

Never show all the text of a supplied worksheet preview. Use only a teaser of the page title and approximately four or five lines where appropriate. Mask or crop the remainder.

---

15. EXACT PAID SALES PAGE COPY

Important implementation instruction

Everything in this section that is explicitly identified as approved website copy must be implemented with its wording preserved.

The production notes included below explain the placement and treatment of the copy. They are not visible website text.

Preserve the supplied section sequence: Sections 1–7.

PAID PAGE — SECTION 1: THE HOOK

Display the following copy:

🚀 What if one download could change your LIFE?

92% of People Are Silently Deleting Their Own Future. Are You Next?

Stop waiting to “feel like it.” You don't lack potential. You lack a system that keeps you moving when motivation disappears.

Let’s be entirely honest: Motivation is a scam.

You've tried the speeches. The podcasts. The viral quotes. The Monday resets.

And for a little while, you believe this time will be different. Then the feeling fades. The plan slips. The promises get postponed. And somehow, you're back in the same place, making the same promises to yourself that you made months or years ago.

How many times are you going to promise yourself a different life and then repeat the same patterns that keep you where you are?

You do not need another fresh start. You need to face the brutal truth.

Design instructions: Create a compelling, premium hero with clear visual hierarchy. Use the paid product's mockups to support the headline and communicate the substance of the system. Do not introduce an unapproved GIF or unrelated generated product artwork.

PAID PAGE — SECTION 2: THE AUTHOR PROFILER: RECONSTRUCTION FROM ZERO

Section heading:

THE AUTHOR PROFILER: RECONSTRUCTION FROM ZERO

Display the following copy:

"I Had to Rebuild a Life I Never Planned to Lose.

I know exactly what it feels like to have your entire life and every single one of your plans changed without your permission.

My life vanished when I had an accident during COVID. I lost my legs. The same year, I lost millions-of-yuan business — all while navigating life from a wheelchair. I didn't rebuild my life and become a global mentor through motivation. I rebuilt everything because I engineered an execution structure that completely ignored how I felt. If a woman navigating life from a wheelchair can dismantle every excuse and build global stability, so can you. But you cannot change what you refuse to confront."

Design instructions: Place my supplied photograph in this section. Give it a professional cinematic treatment, mostly monochrome with a subtle vignette if appropriate. The photograph should feel like a deliberate editorial portrait and integrate naturally with the author story. Do not invent details about my experiences or alter the approved wording.

PAID PAGE — SECTION 3: WHO THIS IS FOR

Display the following copy:

This is a closed-door protocol. Read carefully before entering. YOUR FINAL YEAR PROTOCOL is for you if:

You've Done the Audit -Before The Year Ends: You've examined your reality, identified your patterns, measured the gap, and you're ready to confront what must change.

You’re Done With Motivation: You've tried the speeches, podcasts, quotes, and Monday resets. Now You are ready for a hard system that doesn't care how you feel.

You Keep Starting Over: New year, new plan, same results. You're ready to build the structure that makes lasting change possible.

You’re Successful But Want More: You're doing well, but you know there's another level you're ready to reach.

You Feel the Clock: Time is moving, and you know you can't afford another year of postponing what matters.

You Want to Build Something That Lasts: You're done with temporary fixes. You want a lasting system for how you live, work, focus, and execute.

You Know You're Capable of More and Finally Ready to Prove It: You're ready to prove it to yourself through what you actually do, not what you promise.

You’re Seeking Direction and Alignment: You want your health, finances, career, relationships, growth, and daily choices working together, not pulling you apart.

Design instructions: Present these items in an attractive, readable layout with beautifully presentable mockup. You may use carefully designed cards or a structured grid, but do not remove, shorten, or rewrite any item.

PAID PAGE — SECTION 4: WHAT THE SYSTEM IS

Display the following copy:

YOUR FINAL YEAR PROTOCOL is not an inspirational book. It is a digital, mechanical execution engine.

This is not a productivity manual with recycled advice, and it is definitely not a collection of feel-good essays telling you to wake up at 5 AM. It will not coddle you. It will not motivate you. It will confront you, expose you...

- It is a framework you work through, not a book you read. It is packed with interactive workspaces, operational calculators, binding contracts, and automated reset systems.
- It is built to permanently rewrite the way you operate, bringing you the long-term, high-leverage achievements you promised yourself before you began settling.
- It is a life system for the person you are actively running out of time to become. An execution solution for the person you keep promising yourself you will become.

FIRST TEXT-ONLY CTA — NO PRICE AND NO BUTTON

Display this exact copy as a visually distinct text-only call to action:

Want YOUR FINAL YEAR PROTOCOL? Zero excuses. Non-negotiable rules. No compromise. Permanent realignment. Scroll down to download.

Important: This is not a purchase-button placement. Do not add a price or button to this first CTA. Also display mockup merged with matching visuals to build interactiveness and trust.

PAID PAGE — SECTION 5: TESTIMONIAL INTRODUCTION

Display this exact copy immediately above the six testimonial screenshots:

Data Doesn't Lie. Here is what happens when you stop waiting for motivation and downloads an unshakeable execution structure. Unfiltered results from individuals who chose to stop drifting and finally faced their reality.

Then display the six supplied testimonial screenshots from:

`1. Your Final Year Protocol Sales Page Content and Media`

Use `testimonial 1` through `testimonial 6`.

Design instructions: Present the actual screenshots in a polished, visually balanced testimonial section. Do not replace them with invented testimonials or rewrite their content. Ensure the screenshots remain legible on mobile.

PAID PAGE — SECTION 6: THE 3-PHASE ARCHITECTURE — WHAT'S INSIDE

Section heading:

THE 3-PHASE ARCHITECTURE — WHAT'S INSIDE

Display the following copy:

The system is completely stripped of theoretical nonsense and broken down into three striking, high-impact operational layers:

Phase 1: The Life Alignment Diagnosis

This section forces a brutal, deep-dive examination of the 10 core areas of your life: health, money, career, growth, family/friends, partner/love, fun, environment, spirituality, and community.

You aren't lazy; you are fundamentally misaligned. This phase uncovers the exact structural leaks causing you to break promises to yourself. It maps out the unfiltered, raw condition of your life right now so you can stop fixing the wrong problems.

Phase 2: The Urgency Catalyst (Memento Mori)

This phase frantically confronts you with the absolute reality that your time is finite. It is time to stop acting like you have 500 years left on earth.

This Phase injects an healthy urgency and accountability into your daily routine. By revealing exactly how fast your clock is moving, it triggers an intense identity discomfort—proving that you are capable of exponentially more than where you are currently settling.

Phase 3: The Fearless Formula (The Execution Code)

This is the engineered solution to completely rebuild your daily operation from scratch. You will receive a practical, strategic execution system built on The 11 Master Frameworks: Procrastination, Urgency, Life Alignment, Focus, Mornings, Energy, Boundaries, Legacy, Money, Relationships, and the Perpetual Reset.

THE CORE ENGINES OF EXECUTION

Production note: "THE CORE ENGINES OF EXECUTION" is the heading for the following content. Present it as a visible subheading. Do not display the surrounding production note.

Inside Phase 3, you unlock the operational assets that turn chaos into absolute automated execution:

- **The Dominant Impact Identifier (The 80/20 Dominoes):** A legendary focusing strategy that helps you instantly isolate the few vital actions that create a massive ripple effect. You will learn how to focus exclusively on just 2 core areas of your life that will automatically trigger success across the remaining 8, saving you massive amounts of time and eliminating execution stress. Don't try to repair everything. Find the domino.

- **Execution Over Motivation:** The raw, mechanical blueprint designed to stop your dependency on temporary emotional intensity and fleeting inspiration.
- **The Accountability Mirror:** The unshakeable self-grading protocol that keeps you executing at peak performance when absolutely no one is watching.
- **The Execution Code:** A daily ritual and commitment matrix that transforms high-level philosophy into an automated, daily reality.

PRODUCT VERSIONS — DISPLAY EXACTLY

Your Final Year Protocol is delivered in two digital formats containing the exact same unshakeable execution system. Choose your version below:

- 📱 Standard Version: Perfect if you want to print it out to write by hand, or import it into handwriting apps like Goodnotes, Notability, or Xodo to work with a stylus.
- 💻 Fillable Version: Perfect if you prefer typing directly into the document using any laptop, phone, or tablet without printing.

Choose your format. Install your system. Execute your reality.

FIRST PAID OFFER — PRICE AND PURCHASE BUTTON

Display this exact offer wording:

YOUR FINAL YEAR PROTOCOL l The Alignment Diagnostic | The Identity Discomfort Catalyst | The Fearless Formula | No Motivational Highs | Not Self-Help Junk. ($57 crossed) $27

Design instructions:

- Render `$67` with a strikethrough.
- Display `$27` as the current price.
- Use a clearly visible purchase button that directs to `https://gopekk.gumroad.com/l/yfyp`.
- Do not change the price.
- Preserve the supplied offer wording, including its original phrasing.

CHECKOUT NOTE — IMMEDIATELY BELOW THE BUY BUTTON

Display this exact sentence in italics immediately beneath the purchase button:

100% Secure Checkout. Clicking BUY BUTTON will redirect you to Gumroad (our verified hosting and delivery portal) for encrypted payment processing and immediate product file delivery.

Do not display the instruction about italics. Apply the italic styling to the actual sentence.

PAID PAGE — SECTION 7: CHARITY AND FINAL CONFRONTATION

CHARITY STATEMENT

Display this exact copy:

As you invest in yourself and take steps toward becoming the person you want to be, you're also contributing to something bigger. 5% of the proceeds from this page goes toward supporting the less privileged. Your progress can create an impact beyond your own life.

Design instructions: Present this as a supporting element of the offer. Keep the paid product's value and execution system at the center of the page. Do not invent donation amounts, recipient names, organizations, partnerships, or claims of completed donations.

FINAL CONFRONTATION AND CTA

Display this exact copy:

Everything in this system is built on a single, unshakable conviction: You don't need to feel like doing it. You need a system that works whether you feel like it or not.

There is already enough unfinished business in your life. Do not purchase this system if you want comfortable inspiration to file away and forget. Acquire this protocol only when you are done lying to yourself — and ready to prove it with what you do next.

The Clock is Ticking. Secure Your Operating System.

FINAL PAID PURCHASE BUTTON

Use this exact button label:

⚡ ACTIVATE YOUR PROTOCOL INSTANTLY ($67 crossed) $27

Design instructions: Style `$67` with a strikethrough and `$27` as the current price. The button must direct to:

`https://gopekk.gumroad.com/l/yfyp`

CHECKOUT NOTE — IMMEDIATELY BELOW THE FINAL BUTTON

Display this exact sentence in italics:

100% Secure Checkout. Clicking BUY BUTTON will redirect you to Gumroad (our verified hosting and delivery portal) for encrypted payment processing and immediate product file delivery.

PAID PAGE CLOSING IDENTITY

Display the following closing text:

YOUR FINAL YEAR PROTOCOL

The execution system for the person you still have time to become.

---

16. PAID PAGE DESIGN CHECKLIST

Before completing the paid page, verify all of the following:

- The title is exactly `YOUR FINAL YEAR PROTOCOL`.
- The subtitle is exactly `The execution system for the person you still have time to become.`
- The old subtitle, `A Productivity System for Focus, Discipline & Execution.`, is not used as the paid product subtitle.
- The rating line is `★ ★ ★ ★ ★ 5 | 385 REVIEWS`.
- The theme toggle appears immediately below the rating line and above the hero.
- The page includes Sections 1–7 in the specified order.
- The author photograph appears in Section 2 with the requested cinematic treatment.
- The six paid testimonial screenshots are used.
- The four paid product mockups are used thoughtfully where appropriate.
- The three-phase architecture is presented completely.
- Both product formats are described exactly as supplied.
- The $67 reference price is crossed out and the $27 price is displayed correctly.
- The first CTA in Section 4 is text only, without price or purchase button.
- The first purchase button appears after the product-version descriptions in Section 6.
- The final purchase button appears in Section 7.
- Both purchase buttons lead to the paid Gumroad URL.
- Both checkout notes appear immediately beneath their respective buttons in italics.
- The charity statement is included with the supplied wording.
- The closing title and subtitle are present.
- No paid-page content has been silently rewritten, omitted, or invented.

---

17. EXACT FREEBIE LANDING PAGE COPY

Important implementation instruction

Everything below that is explicitly identified as approved website copy must be displayed with the wording preserved.

The parenthetical and bracketed directions are production instructions unless the surrounding context explicitly identifies the enclosed text as a visible heading, paragraph, or button label.

Preserve the supplied section sequence: Sections 1–7.

FREEBIE PAGE — SECTION 1: THE HOOK

Display the following copy:

What if your life isn't going wrong… it's just going unexamined?

Before you set another goal, make another promise, or plan another year, take an honest look at the life you're actually living. You don't need another fresh start. You need to face the truth. One honest life audit could reveal what years of motivation never did.

BEFORE THE YEAR ENDS is a confrontational life-audit that exposes where your life is silently collapsing before another year disappears. It Confront your reality. Expose the pattern. Calculate the cost of delay. Decide what changes next. and it is 100% FREE

Its A Life Audit for the Person You Still Have Time to Become’

First FREE mention — special styling

The first mention of `100% FREE` must be visually prominent: bold, larger than surrounding body text, and styled in a lighter or brighter accent color suitable for the page's theme.

Do not display the styling instruction itself.

Hero design instructions

Make the headline immediately noticeable. Present the freebie's value and its free status clearly without burying the download opportunity far below the fold.

Use the supplied freebie product mockups in an attractive hero composition. Keep the layout clean, premium, and responsive.

Do not invent a new headline or replace the supplied copy.

FREEBIE PAGE — SECTION 2: THIS IS NOT A MOTIVATION MATERIAL

Display the following copy:

This Is Not a Motivation Material. It Is a Life Reset System.

Be honest. Nobody's watching.

Are you living the life you wanted, or have you spent the last few years convincing yourself to be satisfied with a life you merely settled for?

You may be working hard. You may be earning well. You may have achieved things other people admire. But are you making progress in the areas that genuinely matter to you?

Because being successful in one area doesn't mean every other area of your life is where it should be.

And being busy doesn't mean you're moving in the right direction.

BEFORE THE YEAR ENDS helps you confront the gap between what you intended to do and what your life actually reflects. Identify the patterns keeping you stuck, examine the cost of continuing as you are, and decide what deserves to change.

You don't need another temporary shot of motivation. You need an honest assessment of your reality.

The question isn't whether you have potential. It's what your life can actually prove.

Design instructions: Use typography, spacing, and subtle visual structure to make this section easy to read. Avoid presenting it as a dense, uninterrupted wall of text.

FREEBIE PAGE — SECTION 3: WHAT'S INSIDE BEFORE THE YEAR ENDS?

Display the following copy:

WHAT'S INSIDE BEFORE THE YEAR ENDS?

This is a raw, 20-page terminal architecture packing 9 deeply confrontational diagnostic workspaces that strip away every layer of self-delusion to reveal the exact reality of your current existence. ,

INSIDE:

🕮 THE CORE VISION LEDGER

Put the life you intend to build on record. List the promises, commitments, ambitions, changes, and unfinished pieces of your life that still matter to you. Then mark what became reality — and what didn't.

This is where you stop looking at your life through intention and start looking at it through evidence.

📊 THE EXECUTION SCORECARD

Measure the gap between what you said you would do and what your life actually reflects. The calculation is simple. The result is difficult to argue with.

This is not a score of your worth. It is a snapshot of your current execution pattern.

🔍 THE PATTERN DETECTOR

Identify the structural leaks in your execution, whether they involve fading motivation, postponement, inconsistency, distraction, avoidance, constant restarting, or lack of structure.

The goal is not to label yourself. It is to identify what keeps pulling you away from the person you want to become.

THE REALITY RECEIPT

Choose the area of your life you can no longer comfortably explain away. Put the record in front of yourself: what you said would happen, what actually happened, how often you restarted, what you keep telling yourself, and what an honest observer would conclude.

⏳ THE DELAY COST CALCULATOR

Put a price on staying stagnant. Examine what another 12 months or five years of repeating the same patterns could cost you in wealth, opportunities, relationships, personal growth, and peace of mind.

⚖️ THE REALITY VERDICT PROTOCOL

Turn awareness into a non-negotiable decision. Confront what must change, define what you are no longer willing to repeat, and decide what deserves your attention next.

Because awareness without a decision eventually becomes another forgotten realization.

⚡ THE 3 ALPHA CONFRONTATIONAL TEST

The personal reckoning that ended my dependence on motivation, confronted me with the time I actually have, and forced me to take responsibility for what happens next.

✨ AND MORE…

This goes beyond identifying what went wrong. It's an opportunity to examine where your life stands, what has been holding it back, what matters most now, and what must happen next.

Design instructions for Section 3

Present the diagnostic workspaces as a polished set of visual cards, structured rows, or another premium layout that fits the available screen width.

Use the eight supplied worksheet/page-preview images and the four supplied freebie product mockups where appropriate. Do not simply place all the images together without a clear visual purpose.

Protect the worksheet content: Any supplied page image used as a marketing preview must reveal only the title and, where appropriate, approximately four or five lines. Mask, crop, fade, or cover the remaining lower content. Do not expose a complete worksheet.

Do not add extra workspaces or invent additional product contents.

FREEBIE PAGE — SECTION 4: TESTIMONIAL INTRODUCTION

Display this exact introductory copy:

The evidence is undeniable. Unfiltered, real-world operational breakthrough testimonials from individuals who have downloaded and used the system…

Testimonial widget requirements

Build a beautiful, engaging, professional testimonial widget using text-based cards.

Do not use testimonial pictures for this section.

Each testimonial must include the supplied person's name and their complete supplied testimonial. Do not shorten, rewrite, paraphrase, or correct the testimonials.

Use a responsive layout with attractive typography, restrained accent colors, clear separation between testimonials, and comfortable reading space.

You may use a responsive grid or a carefully implemented carousel, provided that visitors can access all ten testimonials easily. Do not hide essential content behind inaccessible interactions.

TESTIMONIAL 1

Jessica Morgan

Not me downloading a FREE PDF and ending up questioning half the decisions I've made this year 😭😂 I thought it was just another free PDF… I thought I'd skim through it in 5 minutes. Turns out the materia is a self accountabilly enforcer. This was not what I needed!

TESTIMONIAL 2

Brittany Coleman

At this point, my excuses deserve a certificate 😂 Every broken promise had a reasonable explanation at the time. Looking at them together? Different story entirely. This freebie came with an unexpected reality check!

TESTIMONIAL 3

Ashley Bennett

Whew! The broken promises part got me. New routine, new goals, new plans… same old excuses. Seeing it all laid out made it harder to pretend I didn't notice the pattern. I needed this more than I thought. Thanks GoPek team

TESTIMONIAL 4

Ryan Mitchell

OMG, why did calculating the cost of delay hit harder than all the motivational videos I've watched? 😕 You keep saying ‘I'll do it later’ like time is waiting for you. This made me stop and think about what I'm actually doing with mine.

TESTIMONIAL 5

Christopher Hayes

What I liked is that this isn't just for someone whose life is falling apart. You can be working, earning, achieving things and STILL know you're neglecting something important. The questions made me look beyond the things I can easily call achievements.

TESTIMONIAL 6

Megan Parker

Woah. I downloaded this expecting a few nice reminders, not questions I'd still be thinking about hours later. Sometimes you don't need another person to motivate you. You need to sit down and be honest with yourself.

TESTIMONIAL 7

Tyler Anderson

New month, new me. Monday, new plan. Birthday, fresh start. 😂😂 Somehow, the same things kept following me around. This audit made me look at why I kept restarting without really changing the pattern. That part was uncomfortable, but useful.”

TESTIMONIAL 8

Lauren Mitchell

I appreciate that it doesn't make you read pages and pages of advice before getting to the point. You actually have to write things down, examine your promises and face your answers. Simple format, serious questions. Definitely makes you participate.”

TESTIMONIAL 9

Brandon Foster

The part about recognizing your patterns? Yeah… I wasn't ready 😂 It's easy to blame circumstances for everything, but sometimes you have to look at what you've repeatedly done or avoided. This free download made me question a few things I'd been telling myself.

TESTIMONIAL 10

Samantha Brooks

Okay, if this is what GoPek Digital is giving away for free, I'm curious about the full system. 👀 This isn't one of those downloads you collect and forget about. The questions and workspaces on each pages alone make you pause and think. I'm glad I actually sat down and worked through it.

TEXT-ONLY CTA AFTER THE TESTIMONIALS

Display this exact copy after the testimonial widget:

Stop running out of time for the person you keep promising to become.

Then display this exact directional CTA:

SCROLL DOWN TO GET YOUR FREE DOWNLOAD

Important: This is text, not a download button. Style it so it catches the visitor's attention and clearly directs them to continue down the page.

FREEBIE PAGE — SECTION 5: WHAT WILL YOU WALK AWAY WITH?

Display the following copy:

WHAT WILL YOU WALK AWAY WITH?

This isn't another collection of feel-good essays or motivational quotes you'll forget tomorrow. It's a practical, confrontational life-audit experience designed to...

🔍 Expose the gap between the life you have and the life you actually want.

📊 Measure how much of your ambition has become reality — and how much remains talk.

Identify the patterns, excuses, and habits quietly influencing your decisions.

⏳ Examine the potential cost of another year spent repeating the same routines without meaningful progress.

🎯 Discover which areas of your life need urgent attention and which deserve greater ambition.

⚖️ Confront the truth about your progress without hiding behind intentions or past achievements.

🚀 Turn your findings into a clear decision about what must change, what deserves your focus, and what happens next.

Whether you're trying to get your life back on track or already doing well and want to identify your next level, this this is what you need an it’s free

Design instructions: Present the benefits in a visually clear format. Use appropriate icons and whitespace. Preserve all wording exactly.

FREEBIE PAGE — SECTION 6: WHY I CREATED THIS

Section heading:

WHY I CREATED THIS

Display the following copy:

I know exactly what it feels like to have your life and plans changed without your permission. I had a devastating accident. I had to learn how to navigate the world from a wheelchair. And right in the middle of that physical crisis, I still watched my life savings—a global business worth millions of yuan—vanish entirely.

I didn't rebuild my life and become a global mentor because I was motivated. Motivation is a dangerous lie. I rebuilt it because I engineered a structure that didn't care how I felt. If a woman navigating life from a wheelchair can dismantle excuses and build global stability, so can you. But it starts by facing your reality..

You cannot change what you refuse to confront.

Creator photograph

Place my supplied photograph in this section.

Use a professional cinematic, mostly monochrome style with a subtle vignette where appropriate. The treatment should be consistent with the photograph on the paid page while allowing the freebie page to retain its own visual identity.

Do not use a generic replacement photograph or invent new biographical details.

PRODUCT VERSIONS — DISPLAY EXACTLY

Before The Year Ends is delivered in two digital formats containing the exact same life-reset experience. Choose your version below:

- 📱 Standard Version: Perfect if you want to print it out to write by hand, or import it into handwriting apps like Goodnotes, Notability, or Xodo to work with a stylus.
- 💻 Fillable Version: Perfect if you prefer typing directly into the document using any laptop, phone, or tablet without printing.

Choose your format. Complete your audit. Face your reality.

DOWNLOAD CTA COPY

Display this exact copy immediately before the download button:

You have spent enough years masterfully convincing yourself to be satisfied with a life you merely settled for. Your life isn't standing still; you are actively trading your highest purpose for a comfortable trap.

DOWNLOAD BUTTON

Use this exact button label:

⚡ RECLAIM YOUR REALITY: FREE DOWNLOAD

The button must direct to:

`https://gopekk.gumroad.com/l/bye`

NOTE BELOW THE DOWNLOAD BUTTON

Display this exact sentence immediately below the button:

Note: Clicking the Download button will securely redirect you to Gumroad, our verified hosting and delivery portal, where you can complete your instant free download.

Do not rewrite this note. Do not claim that the website itself hosts or directly delivers the PDF.

FREEBIE PAGE — SECTION 7: FINAL CONFRONTATION AND CTA

Display the following copy:

Remember, Every promise you made to yourself, whether it was a childhood dream or a calculated goal from last year, was originally connected to a vision of a better life. Over time, promises get forgotten, postponed, renegotiated, or quietly replaced. BEFORE THE YEAR ENDS is your private life auditor, patterns, priorities detector, and the cost of continuing exactly as you are calculator.

Don't download it because it's FREE Download it only when you're ready to tell yourself the truth

There is already enough unfinished business in your life.

A Life Audit for the Person You Still Have Time to Become.

100% FREE.

FINAL FREEBIE BUTTON

Use this exact button label:

GET YOUR FREE LIFE AUDIT NOW

The button must direct to:

`https://gopekk.gumroad.com/l/bye`

NOTE BELOW THE FINAL DOWNLOAD BUTTON

Display this exact sentence immediately below the button:

Note: Clicking the Download button will securely redirect you to Gumroad, our verified hosting and delivery portal, where you can complete your instant free download.

Do not omit the final CTA or merge it into Section 6.

---

18. FREEBIE PAGE DESIGN CHECKLIST

Before completing the freebie page, verify all of the following:

- The title is exactly `BEFORE THE YEAR ENDS`.
- The subtitle is exactly `A Life Audit for the Person You Still Have Time to Become.`
- The rating line is `☆ ☆ ☆ ☆ ☆ 5 | 1,574 DOWNLOADS`.
- The theme toggle appears immediately below the rating line and above the hero.
- The first mention of `100% FREE` in Section 1 is bold, larger, and visually prominent.
- Sections 1–7 appear in the specified order.
- The four supplied freebie mockups are used thoughtfully where appropriate.
- The eight worksheet-preview images are used appropriately.
- No preview exposes the complete worksheet or full page.
- The supplied photograph appears in Section 6, “WHY I CREATED THIS.”
- All ten written testimonials are present with their correct names and wording.
- The testimonials are text-based, not testimonial pictures.
- The text-only CTA after the testimonials is present.
- The Standard Version and Fillable Version descriptions are present and unchanged.
- The Section 6 download button has the exact supplied label and correct Gumroad destination.
- The Section 6 explanatory note appears immediately beneath the button.
- The Section 7 final copy is present.
- The final download button has the exact supplied label and correct Gumroad destination.
- The final explanatory note appears immediately beneath the final button.
- The page remains visually distinct from the paid page.
- No copy has been silently shortened, rewritten, or omitted.

---

19. FINAL TECHNICAL AND CONTENT AUDIT

Before declaring the website finished, perform a systematic final audit.

A. Website structure

- One website, not two separate projects.
- One codebase.
- One GitHub repository.
- One Cloudflare Pages project.
- Paid route: `/`.
- Freebie route: `/free`.
- Both pages open directly and work on refresh.

B. Product identity

- Correct product name and subtitle on each page.
- Correct copy assigned to each page.
- No paid/freebie content accidentally swapped.
- No old paid subtitle used in the website.

C. Theme and visual behavior

- Light mode is the default.
- Dark mode is intentionally designed.
- Toggle position is correct on both pages.
- Both toggles work.
- Theme preference persists across the two routes where practical.
- Layouts work on desktop, tablet, and mobile.
- The supplied mockups and photographs display correctly.
- Freebie page previews do not expose full worksheet contents.

D. Social proof and claims

- Correct paid rating and review count.
- Correct freebie rating and download count.
- Six paid testimonial screenshots used.
- Ten freebie text testimonials present.
- No invented testimonials or unsupported statistics.

E. Conversion and links

- All paid purchase buttons point to the paid Gumroad URL.
- All freebie download buttons point to the freebie Gumroad URL.
- All navigation links point to the correct page or section.
- All specified checkout/download notes are present and styled correctly.
- No dead buttons or fake checkout flows.

F. Copy audit

Compare the final website against the approved copy in this prompt and the source documents.

Check every headline, paragraph, bullet point, testimonial, product-format description, price, button label, explanatory note, and closing line.

If any required text is missing or different, correct the implementation to match the approved source. If there is a genuine conflict between source documents, report it rather than silently choosing a new wording.

G. Honest completion report

At the end, provide a concise but useful report stating:

1. What was implemented.
2. Which requirements were successfully tested.
3. Which requirements could not be tested in the current environment.
4. Whether the code is ready for GitHub and Cloudflare Pages.
5. Which manual steps I still need to complete.
6. Whether the custom domain and live deployment have actually been configured, or are still pending.

Do not claim that the website is live, the domain is connected, the buttons have been verified, or the theme preference persists unless the relevant behavior has actually been checked.

---

20. FINAL OPERATING RULE

My approved copy and supplied assets are the foundation of this project.

Design the website around the content. Do not rewrite the content to suit the design.

Inspect first. Report issues. Wait for authorization. Then build the two pages as one professional website.

Preserve the distinction between the paid execution system and the free life audit. Keep both pages visually compelling, lightweight, accessible, responsive, and functional.

Do not invent content, invent assets, fabricate testing results, or make unapproved live changes.

The final result should look and behave like a carefully designed, premium digital-product website—not a generic AI-generated template.
